WAPT — Phase 1 Submission Guide

⏰ Phase 1 Final Submission Deadline

Submit between 12-15 October 2026
Don’t Send before 12 October, Take time to Enhance Your Folder

All WAPT interns must submit their completed Phase 1 tasks before the deadline.

📂 Submission Folder

Create one Google Drive folder using this naming format:

YourName_WAPT_Phase-1

Organize your submission as follows:

```
YourName_WAPT_Phase-1/
        1.Web-Fundamentals
                |____Room1_RoomName
                        |___Reports / Documents(PDF)
                        |___ScreenShots
                        |___Completion Links(If applicable)
                |____Room2_RoomName
        2.Recon-Enumeration
                |____Room1_RoomName
                |____Room2_RoomName
                |____Room3_RoomName
        3.Burp-Suite
                |____Room1_RoomName
         4.Common Web Vulnerabilities
                |____Room1_RoomName
                |____Lab1_LabName
```

REPORT & DOCUMENTATION GUIDELINES

For WAPT tasks, create a separate report for each major task instead of combining everything into one report.

Submission Structure:

YourName_WAPT_Phase-1/

- **Task 1: Web Fundamentals**
  - Report.pdf
- **Task 2: Recon & Enumeration**
  - Report.pdf
- **Task 3: Burp Suite**
  - Report.pdf
- **Task 4: Web Vulnerabilities**
  - **SQL Injection**
    - Report.pdf
  - **XSS**
    - Report.pdf
  - **Authentication & Access Control**
    - Report.pdf
  - **Path Traversal or File Upload**
    - Report.pdf

Report Format:

1. **Objective — What was the task about?**
2. **Concept/Understanding — What did you learn?**
3. **Practical Work — What did you perform?**
4. **Tools Used — Tools used during the task.**
5. **Evidence — Relevant screenshots and results.**
6. **Result — What did you achieve or discover?**
7. **Key Learnings — What did you learn from the task?**

For Multiple Labs:
If a task contains multiple related labs, you do not need to create a separate report for every lab. You can include all related labs in one report.

- **Example:**
  - **SQL-Injection/**
    - **└── Report.pdf**
  - **The report can contain:**
    - **Lab 1 — Objective, Testing, Evidence, Result**
    - **Lab 2 — Objective, Testing, Evidence, Result**

Keep your reports clear, concise, and organized.

Keep your reports clear, concise, and organized. There is no need to make the reports unnecessarily long.

Focus on demonstrating your understanding and practical work, not on creating lengthy documentation.

📑 What to Include

Your submission should contain evidence of your learning and practical work, such as:

- **Notes and explanations**
- **Screenshots**
- **Burp Suite requests/responses**
- **PortSwigger lab evidence**
- **TryHackMe progress/evidence**
- **Vulnerability testing observations**
- **Reports/documentation**
- **Commands or techniques used**
- **Any additional practice or work**

Do not submit only completion screenshots.

The goal is to demonstrate that you understood the concepts and actually practiced them.

🔍 For Vulnerability Testing Tasks

For each vulnerability/lab, try to document:

1. **Lab Name**
2. **Objective**
3. **Vulnerability/Concept**
4. **Testing Approach**
5. **Evidence/Screenshots**
6. **Impact**
7. **Remediation**
8. **What You Learned**

Your documentation does not need to be overly complicated. Clear and understandable documentation is more important than unnecessary length.

🔗 How to Submit

1. **Complete your Phase 1 tasks.**
2. **Organize everything inside your WAPT submission folder.**
3. **Upload all required files and evidence.**
4. **Set the folder permission to:**

Anyone with the link → Viewer

5. **Copy the Google Drive folder link.**
6. **Submit the link through the designated submission method.**

⚠️ Before submitting

Open your Google Drive link in an incognito/private window and make sure the folder and files are accessible.

🎯 Evaluation Focus

Your submission will be reviewed based on:

- **Understanding of WAPT concepts**
- **Practical application**
- **Testing approach**
- **Quality of evidence**
- **Documentation**
- **Problem-solving**
- **Organization**
- **Overall learning and effort**

Completing a lab is not the only goal. Understanding why the vulnerability exists, how it can be identified, its impact, and how it can be fixed is much more important.

🚀 Moving to Phase 2

Phase 2: 15–25 October 2026

After Phase 1, interns will move to Phase 2, where they will apply the knowledge gained during Phase 1 to a practical, real-world-style WAPT project.

A strong understanding of Phase 1 will make Phase 2 much easier.

🔐 Remember

Learn the concept → Practice it → Understand the vulnerability → Document your work.

Learn. Practice. Secure.
