## 1. Web Fundamentals

**Understand how web applications work**

- HTTP/HTTPS
- Requests & Responses
- HTTP Methods
- Headers
- Cookies & Sessions
- Parameters
- Authentication
- Status Codes
- Basic APIs

TryHackMe Room

1. https://tryhackme.com/room/webapplicationbasics
2. https://tryhackme.com/room/httpindetail

## 2. Reconnaissance & Enumeration

**Understand and map the application's attack surface**

- Technology identification
- Subdomains
- Directories & endpoints
- Parameters
- Login pages
- API endpoints
- Hidden functionality
- Basic information gathering

3. **https://tryhackme.com/room/contentdiscoveryx**

## 3. Burp Suite

**Learn to intercept, analyze, and modify web traffic**

- Proxy
- HTTP History
- Repeater ⭐
- Intruder
- Decoder
- Request/Response analysis
- Modifying requests
- Testing application behavior

## 4. Common Web Vulnerabilities

**Learn to identify and test vulnerabilities**

- SQL Injection
- XSS
- Authentication vulnerabilities
- IDOR
- Broken Access Control
- CSRF
- Path Traversal
- File Upload vulnerabilities
- Command Injection
- Other OWASP Top 10 vulnerabilities
